ON

“AN OVERVIEW OF PETROLEUM REFINERY”

REPORT

Government degree college , Ravulapalem Dept. of Chemistry is conducted a Guest Lecture on 9-12-2021. Opening remarks were given by Dr. C. Krishna Principal of the college & he addressed participants of the invited lecture . Vice principal Sri. S.Satyamurthy spoke about the ONGC. Sri. S. Chiranjeevulu ,Retd.Chief manager ,ONGC (QC,R&D) as a resource person delivered an extensive lecture on refinery of petroleum products from crude oil .Petroleum refining process are used in petroleum refineries to transform crude oil into to useful products such as liquefied Petroleum gas gasoline petrol, kerosene Jet fuel diesel oil and fuel oil. Petroleum refining is a complex industry with the different types of process from physical separation units to complicated fluidized bed cracking units, hydro treating, hydrocracking FCC catalytic reforming is isomerization etc. are the major catalytic process is used in petroleum refining to improve the quality of fuel and upgrade the low value residue to high value distillates. Refinery products such as LPG high Naphtha, gasoline, kerosene, diesel, vacuum gas oil. Service Department in refinery are quality control, R&D, fire safety and environment, Instrumentation, documentation and providing various job opportunities for Chemistry students. The guest lecture was very informative. Finally the event ended by proposing the vote of thanks Smt.Rajani incharge of the department.
